NETWORK IN CANADIAN HISTORY & ENVIRONMENT

NOUVELLE INITIATIVE CANADIENNE EN HISTOIRE DE L'ENVIRONNEMENT

### The Canadian History & Environment series

The Canadian History & Environment series of edited collections is the result of a partnership between the University of Calgary Press and NiCHE: Network in Canadian History & Environment / Nouvelle initiative canadienne en histoire de l'environnement. The series brings together scholars from across the academy and beyond to explore the relationships between people and nature in Canada's past. Published simultaneously in print and open-access form, the series then communicates that scholarship to the world.

Two books have been published in the series to date: *[A Century of Parks Canada, 1911-2011](#)*, edited by Claire E. Campbell (2011) and *[Historical GIS Research in Canada](#)*, edited by Jennifer Bonnell and Marcel Fortin (2014). A number of other volumes are in development.

Series editor Alan MacEachern solicits submissions from individuals or teams wishing to develop and edit an individual volume. The volume editor(s) will be expected to offer an introduction and conclusion, and encourage the substantive integration of chapters. Books in the series may be thematically, regionally, or comparatively based. The series is historically-focused, but of special interest are proposals that utilize historical sources and methodologies to explore current environmental issues. Interdisciplinary approaches to the study of nature and the Canadian past are most welcome.

If you are interested in developing a volume for the series, please contact Alan MacEachern at [amaceach@uwo.ca](mailto:amaceach@uwo.ca) or University of Calgary Press at [ucpress@ucalgary.ca](mailto:ucpress@ucalgary.ca).
