Description:
Pirates have been the scourge of the seas since maritime trade and commerce began. From its classical origins to the modern day, piracy has had a significant economic, political, social and cultural effect on societies. The Jolly Roger, Long John Silver, the “prostitute pirate” Lady Cheng, Blackbeard, and Captain Jack Sparrow have informed popular depictions of piracy and stirred romantic visions of freedom, adventure, and buried treasure. This course seeks to separate myth from reality by tracing the history of pirates and piracy from antiquity through the medieval and early modern pasts to the present.

Among the chief questions explored throughout the course will be what constituted piracy in a given era; why people ‘turned pirate’; what a pirate’s life was like; and why pirates continue to generate public fascination. Changes in the definition of piracy, from violent robbery at sea to theft and murder of any kind, were driven by major societal transitions such as the rise of nation-states and their projection of political, military and commercial power through permanent navies. Privateering or state-sanctioned piracy, land versus sea-based piracy, as well as bootlegging and terrorism, will be discussed. Were pirates radicals or democrats? The motives for becoming a pirate and the nature of that reality will be discerned through examining themes of race, class, gender, labour, sex, and religion, as well as the democratic ideals of fraternity, equality, and liberty.

Pirates and piracy will be examined through an interdisciplinary lens, framing questions and using methodologies from history as well as archaeology, film studies, folklore, law, literature, sociology/criminology, visual arts, and music.
