Course Description

From 1933 to 1945, the Nazi Party, led by Adolf Hitler, came to power in Germany. Nazi Germany remains a topic of notable interest today eighty years later. In this class, students will learn about how the Nazi Party developed and came to power. It will focus on its ideology to explore its aims. This course will also explain how a party which focused on hyper-nationalism, hyper-militarism, and anti-Semitism came to take control of Germany. It will then look at the features of the Nazi regime, the role of Adolf Hitler, and how it sought to transform society, culture, economics, and the European continent. Students will understand how the Holocaust developed and the key role that the Nazis played in bringing about the Second World War. The course will discuss how the Nazi regime collapsed and what happened after. Finally, today, as far-right ideas continue to have a hold on society, this class will end by reflecting on some of the legacies and echoes of the Nazi regime, including how and why, despite its hate-filled ideology and the atrocities committed in its name, some people in different parts of the world remain enamored with it, but also how we can compare the Nazi regime to other fascist regimes, both historically, and in the present day.

Antirequisite(s): History 1404E
